---

Currently I am an RMIT student (city campus) where I am training to become a developer, I am seeking employment where I can grow professionally and financially. Although I am new to the industry I am a fast learner, which means I can easily adapt to the ever changing industry.

---

## Education

Royal Melbourne Institute of Technology

Bachelor of Computer Science - **BP094** (2017)

- GPA of 4.0 (out of 4.0) before credit transfer

Bachelor of Software Engineering - **BP096** (2017 - Ongoing)

- GPA of 3.5 (out of 4.0)

Academic transcript as of 23rd January 2018 [here](#).

---

## Experience

### CSIT Mentoring program

I volunteered as a student mentor within RMIT University. Every week I worked with lecturers and other volunteers to handle questions from students that dropped into the session. Groups of students will always require help for different subjects, where flexibility to handle multiple tasks and knowledge across all programming courses are required. Students often came in to debug their **Java** and **C** assignments or for web development assistance (**HTML, CSS, PHP**).

### Personal projects

In my own spare time, I have worked on multiple programs due to a fascination towards certain topics. I have built image scrapers via **python**, or fooled around with various algorithms. Windows on my desktop is limited, so I have installed arch **linux** to gain restrictionless freedom. I upload most of my work to [GitHub](#).

---

## Past professional experience / Achievements
